Experience

Data Science Intern, Unified Mentor Private Limited | Remote/India Jun 2025 – Jul 2025

- Developed ETL pipelines for multi-city accident datasets using Python and SQL, covering data ingestion, cleaning, transformation, and analysis.
- Applied SQL aggregation, feature engineering, and data visualization techniques to identify operational metrics and geographic incident trends.

Machine Learning Intern, Atharvo | Remote/India Jan 2024

- Engineered predictive features from accident datasets and applied SMOTE to address class imbalance for classification workflows.
- Trained and evaluated a Random Forest model for accident severity classification and analyzed feature importance to identify key risk factors.
